

HEP

International Research Awards on High Energy Physics and Computational Science

CALL FOR PROFILE – HEP Awards

About Awards: ScienceFather takes the privilege to awarding the Industrious, Academicians, Researchers, Doctors, Scientist, and Regulators from High Energy Physics fields across the globe to its International Events. The HEP International Research Awards is an annual gathering. This Event is a unique international platform that's a meeting of all Researchers. We look forward to personally welcoming all the award winners.

Objectives: The International Events is awarding high quality Researchers in different subfields. The purpose of award ceremonies and assemblies is to celebrate researcher achievements and motivate them to continue on their path. The Good researchers are more motivated to succeed in their research field. People want to be respected and valued by others for their contribution. Offer the opportunity to be updated on the latest research outputs on several topics. Organize specific workshops around the most attractive and current issues. Gather worldwide experts as Event speakers.

Key Features and Excellent Venue | Inspiring Speakers | Certificate | Medal | Memento | Stage Photograph | Awardees listed on website.

Award Categories: Young Scientist Award | Best Researcher Award | Outstanding Scientist Award | Lifetime achievement Award | Women Researcher Award | Best Innovation Award | Best Faculty Award | Best Scholar Award. Institute/ Organization Awards: Excellence in Innovation | Excellence in Research | Excellence Award (Any Scientific field) | Best Research /Innovation Extension activity.

Topics of Award Subjects include, but are not limited to: Chiral spinors and helicity amplitudes | Chiral symmetry breaking | Effective field theory and renormalization | Electroweak interactions and the standard model | Experimental methods | Free particle wave equations | High energy physics | Interactions and fields | Invariance principles and conservation laws | Lepton and quark scattering | Particle physics and cosmology | Particles and antiparticles | Quark interactions | Spontaneous symmetry breaking | The matter particles | Weak interactions
